SPONSOR & EXHIBITOR OPPORTUNITIES

About the Conference

For decades, [the Foundation for Information Technology Education](#) (FITE) has sponsored, facilitated, supported, and staffed countless collegiate level IT conferences at the local, regional and national levels. In 2018, FITE started producing its own signature event to cater to the evolving needs of students in IT and IS related fields which was an overwhelming success and was held in conjunction with ISECON (Information Systems Educators Conference) as a win-win!

The USITCC is quickly becoming the nation's top IT collegiate competition, networking, and career building event. In one single weekend, student attendees can prove their technology skills amongst their peers in a variety of IT competitions, network with industry professionals, and connect with IT employers looking to fill internships and/or full-time positions.

Conference Attendee Profile

Over 350 of the nation's top IT students and faculty from colleges and universities across the country attended the last live event in Galveston, Texas (2019) and this event has become the new "must attend" IT-centric student competition event of the year. The target audience for USITCC are students majoring in business or computer science concentrating in computer information systems (CIS), management information systems (MIS), computer programming & design, information technology, information systems, and other related majors. The event is open to ALL IT/IS/CS/CIS/MIS accredited college & university students and not associated with any one particular professional organization translating to no additional membership fees or criteria, making it even more affordable and open to all!

ISECON is the "Information Systems Education Conference" and brings together information systems educators from around the world and is the longest, continuously running conference for IS educators (since 1982)! At ISECON, leading educators and technology experts meet to share information about current and emerging technology, a variety of curricular issues, and development techniques, while establishing and strengthening industry/academic relationships.
